The Institute of Materials, 1 Carlton House Terrace, London SW1Y 5DB

British Corrosion Journal — Annual contents 1995

Effect of stoving temperature on corrosion protection of mild steel by 3-(trimethoxysilyl) propanethiol-(1) polymeric film
A. M. Beccaria and G. Poggi 33
Doped zinc coatings as alternative to cadmium coatings
S. A. Panasenko and N. N. Makarchenko 40
Corrosion of mild steel in water
A. D. Mercer and E. A. Lumbard 43
Deleterious role of complexing agents in corrosion of copper–nickel alloys in sulphide polluted sea water
M. R. Reda and J. N. Alhajji 56
Field and laboratory study of cavitation corrosion of nickel aluminium bronze in sea water
H. M. Shalaby, A. Al-Hashem, H. Al-Mazeedi, and A. Abdullah 63
Effect of minor alloying elements on anodic polarisation behaviour of aluminium in carboxylic acid solutions containing chloride, nitrite, and nitrate ions
M. S. Abdel-Aal, M. Th. Makhlouf, and A. A. Hermas 71
Stress corrosion cracking susceptibility of 17–4PH turbine steel in aqueous environments
V. M. Salinas-Bravo and J. G. Gonzalez-Rodriguez 79
Technical note **Stress corrosion cracking of ammonia receiver tank**
K. C. Pattnaik and M. P. Gupta 80
Expert overview **New technologies – new corrosion problems**
E. Heitz 105
Role of Li^+ ions in corrosion behaviour of 8090 Al–Li alloy and aluminium in pH 12 aqueous solution
K. S. N. Murthy and E. S. Dwarakadasa 111
Stress corrosion cracking criteria for high strength steels
W. Karliński and W. Szachnowski 116
Kinetics of sulphide promoted hydrogen penetration of iron
Y. Saito and K. Nobe 119
Application of electrochemical impedance spectroscopy to study efficiency of anticorrosive pigments in epoxy–polyamide resin
A. Amirudin and D. Thierry 128
Corrosion characteristics of mild steel in aqueous solutions of fatty acids
E. F. Otte and W. Skinner 135
Inorganic, physicochemical, and microbial aspects of copper corrosion: literature survey
C. A. C. Sequeira 137
Simulated service test for hydrogen embrittlement of cathodically protected subsea bolting material
H. S. Campbell and R. Francis 154
Expert overview **Corrosion management in the twenty-first century**
K. R. Trethewey and P. R. Roberge 192
Environmental effects on crack closure during fatigue in Al–Zn–Mg–Mn alloy
S.-I. Pyun, S.-J. Orr, Y.-G. Chun, and S.-W. Nam 199
Exfoliation corrosion testing of aluminium alloys
R. Braun 203
Electrochemical sensor for monitoring atmospheric corrosion of zinc alloyed coated steel
N. R. Short, S. Zhou, and J. K. Dennis 209
Electrochemical sensor for monitoring atmospheric corrosion of polymer coated metal
A. Amirudin and D. Thierry 214
Photocorrosion inhibition of *n* GaAs in acidified aqueous iodide solution
M. M. Khader 221
Corrosion behaviour of aluminium–lithium alloy 8090–T81 in sea water
P. Traverso, A. M. Beccaria, and G. Poggi 227
Electrochemical investigation of corrosion of anodised 1050 aluminium alloy in marine environments
P. Spathis, J. Poulos, and E. Papastergiadis 233
Repassivation of high alloy stainless steels in chlorinated sea water
R. Francis, J. B. Irwin, and G. Byrne 237
Technical note **Weight loss investigation of alternating voltage corrosion of 301, 304, and 316 stainless steels in boiling NaCl solution**
J. A. de Souza, N. Bocchi, and R. C. Rocha-Filho 243
Correlations between experimental and compositional parameters in crevice corrosion
S. P. Trasatti and F. Mazza 275
Influence of passive film composition and sea water pressure on resistance to localised corrosion of some stainless steels in sea water
A. M. Beccaria, G. Poggi, and G. Castello 283
Electrochemical behaviour of aluminium based alloys in presence of chloride ions
R. Babić, M. Metikoš-Huković, S. Omanović, Z. Grubač, and S. Brinić 288
Comparison of accelereated and atmospheric exposure tests for corrosion of aluminium alloys
J. de Damborenea and A. Conde 292
Cyclic voltammetric behaviour of copper rich brasses in NaCl solution
S. S. Abd El-Rehim, F. H. Assaf, A. El-Sayed, and A. M. Zaky 297
Environment sensitive fracture of white zone of Al–Zn–Mg alloy weldments under cyclic loading conditions
G. Kotsikos, J. M. Sutcliffe, and N. J. Holroyd 302
Potential–pH diagram for Fe–H_2O–citric acid system
M. Kubal and F. Panacek 309
Effectiveness of cathodic protection of UNS N04400 heat exchanger tubes for sea water service
A. Al-Hashem and J. Carew 312
Electrochemical assessment of corrosion behaviour of zinc and zinc–nickel alloys in aqueous chloride, sulphide, and chloride–sulphide media
M. Siluvai Michael, M. Pushpavanam, and K. Balakrishnan 317

Technical note **Roles of silicon and aluminium in high temperature oxidation behaviour of low alloy steel ingots in a simulated combustion atmosphere**
Y.-N. Chang 320
